Rajat Nikam

7 years of experience

I am Automation test engineer worked with Java-Selenium.

EDUCATION

Internal LTIMindtree Trainings on Cypress Tool

PLITMS (Buldhana); Amravati University, Maharashtra • B.E

EXPERTISE

• Atlassian Jira

• Eclipse

• Page Object Model

• Selenium

• test automation

• TestNG

SKILLS

Technical: test automation, business requirements, functional specification, functional testing, information technology, operating system, regression testing, requirements analysis, software configuration, telecommunications, test case, test data, printer management, wireless network

Functional: applicant management, production control, quality engineering, revenue management, troubleshooting

Methods: Page Object Model

WORK EXPERIENCE

FOSFOR • **Senior Quality Engineer** • 10/2021 to 02/2025 (3 years and 5 months)

Spectra Decision Cloud is a platform that facilitates your journey from data to decision-making. It optimizes operations across the data value chain by unifying all the components of the modern data stack. It amplifies the capabilities of the various elements in the data cloud, application, and data infrastructure layers through their effective integration and simplifies how organizations interact with their data. The Spectra Decision Cloud empowers users to organize data, build impactful AI applications, and explore their curiosity to uncover new insights and make more outcome focused business decisions in real-time.

- Analyzing & validating the completeness of business requirements.Developed Automation Test Scripts.
- Designed and executed test cases according to functional specifications.
- Generating Regression Test scripts by extracting the requirements that need to be tested from available documentation and analyzing with the relevant people.
- Creating POM (page object model) and Test classes for the framework.
- Retesting defect fixes on each release build.
- Performed Smoke, System and Functional, Retesting, Regression testing.
- Experience in Designing and implementation of TestNG framework with JavaScript.
- Experience in Designing and implementation of TestNG framework with Web driver.
- Performed parameterization to implement Data Driven framework.
- Conduct Internal Test Case Peer Reviews.
- Participated in weekly status meetings with the team, developers to discuss open issues and communicating with onsite team.
- Propose improvements to current practices ensuring that approved enhancement are fully implemented and the repeat errors are eliminated.
- Worked with Selenium Automation testing.
